Course **NDC Class 54**

Research "essential to the achievement of the radio network to red to prevent the violence in the cold southern border" is intended to study the problem of establishing driven and network radio red protection. Violence in the community. And to study the factors. Establishing a network drive and use the radio I achievement both quantitative and qualitative research using quantitative methods. The results showed that Established network, radio, red. In that area. People with high customer satisfaction. Red radio network in the nation, strengthening the capacity. The community is strengthened. Community development. And protect themselves.

Gun robbery incident on January 4, 2547 is the beginning of the return of a new round of violence in the southern provinces of the Army. Ever since the gun incident robbed today. Statistics for the violence in the balance is not increased or decreased significantly at all. Enabling the participation of the public hoping efficiently. All quantization. And quality in the form of red can block radio network. And reduce the violence that is life-threatening. And property of innocent citizens in the provinces as well.
