Course NDC (JSPS) Class 24

A study of Southern Border Provinces Solving Policies Implementation to Practical. An Analytical View in Civil Dimension between B.C. 2545-2554 is a qualitative research. The research aimed is to review and analyze the southern board provinces solving policy developed in 2545-2554 by the government. In other that, this time periods was an established Southern Boarder Provinces Administrative Center. (SBPAC) And also aimed is to suggest effective policies for the government. The documentary research study and In-depth Interview with the specialists and expert in the field of Thailand southern boarder provinces solving and development is need for data gathering. Data were analyzed from document, technical book, research, policies and plans. Combination with qualitative data receive form in-depth interviews. And Then, the researcher also analyzed the policies according to the Southern Boarder Provinces Solving Policies indicators by using analytical framework proposed by researcher. The study found that there were many innovations which government used to solve complex problem in southern board provinces. The result of each policies was a moderate achieved by considered in amount of a violence events all of the area has become low and lower in order. Additional, founded that a quality of life of the people is 5 provinces is more better, too.

The researchers suggested the way for process and concept improving and also how to policies implementation to effective practice in southern border provinces and taking a peaceful and quality of life of the people come back to the southern boarder provinces as follows: Allocate violence in Thailand southern border provinces to be a national agenda for the government (in present and future) has to action as urgent issues of government 's policy and to be continuous. In addition, all of public sector must hold and setting a plan in harmony. Managing for a complex structure at the all level that are complicated to be unity. Selecting good man and high moral officers who want to work in Thailand southern border provinces. In order that selection process be without political power. Empowering provinces to select the high quality members or team work by themselves. Not center public department selected as preceding. Including, provinces could be appropriate setting for planning, budgeting and administrating for problem in each area. Grouping separate unit (civil and military) by setting Integrating unit. Supporting from the government by setting a new or special way for local/area unit such as organization chart, amount of officers, authority and responsibility in order to reduce a complicated work between each minister and center department.
