countries that is a chance to strengthen relationship of international commercial and investment. According to tourism information suggested that if this project existed, it would attractive to the tourists that could help increasing national income also people in those regions. Moreover, economic information shown that the attraction of investment from other countries in Mekong subregions would be a great help to develop these economic regions. As a result, some regional problems such as prostitutes, drugs addicted etc. would be decreased. As to information in commercial pointed that this cooperation would be developed to be the center of investment in Indochina as well as in South East Asia.

Due to the positive state of the arts reviewed towards Thailand had found in economic information that Thailand is a center of Mekong subregions because of appropriated location and landscape, it helps regional people to earn more income. Including business and investment information suggested that Thailand should expand those business and investment and also being main place for raw materials and new sources of production as well as reserved energy in order to support the economic inflation for Thai businessmen. The tourist information shown that Thai tourism business should be developed to international tourist particularly in Indochina and south China area.
