

VONNEE CHANCHITA : A STUDY OF THE OPERATION OF SUPERVISION IN THE
SELECTED OUTSTANDING PRIMARY SCHOOLS IN DISTRICT LEVEL UNDER THE
JURISDICTION OF SAMUT PRAKAN PROVINCIAL PRIMARY EDUCATION OFFICE
THESIS ADVISOR : ASST. PROF. VALAIRAT BOONSWADI, 252 PP.

The purposes of this research were to study the operation and problems of supervision in selected outstanding primary schools in district level under the Jurisdiction of Samut Prakan Provincial Primary Education Office. Research instruments were questionnaires, structured interview sheet and document study forms. Four hundred and forty-three copies of questionnaires were distributed to administrators, assistants administrators and teachers and they were all completed and returned.

Research findings were as follows : the operation of supervision in selected outstanding primary schools were composed of three steps which were project planning, project implementation, and project evaluation.

Concerning the project planning step, the school supervisory committee studied schools' current issues and needs, analyzed problems, sequencing and make alternative solution through meetings prior to project preparation.

Concerning the implementation step, the school supervisory committee was responsible in all activities which were meeting, delegation and classroom supervision.

Concerning the evaluation step, the school supervisory committee conducted both formative and summative evaluation for the purpose of task development.

With regards to problems encountered most schools reported that there were no problems in the operation.
