

## **ACKNOWLEDGMENTS**

First of all, I would like to express my special thanks to the Former Ministry of University Affairs for financial support in 2001 and to thankful to the Faculty of Veterinary Medicine, Kasetsart University, Kamphaengsaen campus, Nakornpathom province, for approve and provide the most generous facilities of this research.

Special thanks to the members of my committee; thesis advisor, Assoc. Prof. Dr. Theera Rukkwamsuk, Assoc. Prof. Dr. Thaweesak Songserm, and Assist. Prof. Dr. Theerapol Sirinarumitr for his kindness, guidance, teaching, improving and correcting my thesis as well as my manuscripts for publication.

I would like to thankful to numerous colleagues at the Faculty of Veterinary Medicine, Kasetsart University who have assisted me in several parts of my research activities. I also thank my laboratory crews whom always support and advise me.

This study was supported by funding from the Center for Agricultural Biotechnology. I also very thank Assoc. Prof. Dr. Pongthep Akranakul, the Head Department of Center for Agricultural Biotechnology.

Last but not least, my parents and my brothers deserve great thank and appreciate their intense encouragement and understandable mind.
