

ACKNOWLEDGEMENTS

Firstly, I would like to thank my advisor, Associate Professor Varangrat Juntasaro, for her advice and guidance in assisting me with this thesis. I also want to acknowledge my debt to her for her counsel and advice which help me to understand the process of research. I also want to thank the members of my thesis committee - Assistant Professor Kriengkrai Assawamartbunlue and Dr. Vejapong Juttijudata – for their suggestions.

I am grateful for the support I received from SUN Microsystems Laboratory at the Asia Pacific Science and Technology Facility Laboratory (APSTF Lab). I am thankful for the financial support I received from the Kasetsart University Research and Development Institute (KURDI) and the Thailand Research Fund (TRF) for the Senior Scholar Professor Pramote Dechaumphai and the Scholar Associate Professor Varangrat Juntasaro.

I thank all others who assist me including Michael Alroe for advice on writing English. Finally, I especially want to thank my family for their suggestions and support when I most needed them.
