ISBN 974-578-788-4.

The purpose of this research was to study the needs for supervisory skill development of the district educational supervisors in Educational Region Eight. Cheeklist and rating scale were used as this research instruments. Three hundred and four questionnaires were distributed to the district educational supervisors. 279 of them were returned. Perecentage, means and standard deviation were used for data analysis.

Research findings were as follows:

It was found that district educational supervisors wanted to develop their supervisory skills at high level in every skill. The most prominent skill was evaluation. Others were identified consecutively namely leadership, group process, personnel administration, and human relations.
