PRAKANSAMUT, 102 PP. ISBN 974-579-309-4.

Military Personnel System is one of the personnel management information systems, using the Naval Personnel System as case study. The objective of this research is to manage all personnel records prepared by all units in Naval Personnel Department by updating all collected data and improving the data collection in their responsibility, such as, navy list in roster, personnel rights of being promoted to higher ranks, financial incentives, and other essential data for information system, especially, for manpower status reports. By managing all personnel records, every sections in Naval Personnel Department can use these informations for their decision support and can finish their jobs in a relatively brief time.
