

## Abstract

A Study on “An opinion of drivers on measures to organize traffic rules : A Study “Pubplachai 1 Police Station” aims to study the knowledge and idea of the drivers on the measures to organize traffic rules specially the 16 charges against the violation of traffic rules,

The 238 sampling cases of drivers in Pubplachai -1 area were collected by method of questionnaires, The data were analysed by statistical method using SPSS, percentage, Mean , Standard Diviation, t-test, F-test.

The findings are as follows:-

Most of the population studies are male, aged between 36-45 years, labour workers income 5001-10,000 per month, residing in Bangkok Metropolitan area and working nearly Promprab area. Most of the drivers possessed license for five years and they drive in the area of Chareonkrung and Vorachak Road. They drive the cars the whole day long from 6.00 to 18.00 hours. Their driving license were seized at least one time on charges of violating the traffic rule specially in the parking of prohibited area.

The research finds that the level knowledge on the measure of 16 charges against violating traffic rules of drivers are at average level and in the charges against the record of 10 and 40 points marks is at average level, but the measure of organizing traffic systems for the safety and for performing duties of policeman, the application of traffic laws to enable the driver for driving within the discipline, police officers attention on charges for those who violating traffic law, all of these are at high level.

The research suggested that the training services should be organized more often to educate the drivers on measures of the 16 charges against the violating traffic laws. The police officers should be more concern in performing their traffic duties with honesty and justice with polite manners and also relax on the charges for those drivers who commit mistake on traffic rules for the first time.
