ABSTRACT

This research is aimed to Study of Administrators and instuctors opinion toward Rajamangala Institute of 1988 industrial trade curriculum implementation in the field of electronic technology at the vocational certificate of private vocational school in Bangkok Metropolis area about the management and curriculum service , text curriculum , area and factory building , learning and teaching activities , instructional media and measurement and evaluation. The samples were 173 from 26 Administrators and 147 instrutors while research instrument was rating scale questionare and the informations were send and collected by researcher in 1995

The researcher was found that more than 2/3 of Administrators and instructors are men , graduate university degree and work less than 5 years. The result of the study showed that the remaining 7 in a middle level category. On comparison of two groups , opinions it was found that they significant different at .05 which correspondent to the hypothesis.

Based on such finding , it was recommended that Administrators and teachers require to be training in the school , providing the appropriate and sufficient text curriculum in improve instructional media by setting the centre of instructional media and increasing the qualification people in field of electronics technology.
