

LIST OF TABLES

Table	Page
LITERATURE REVIEW	
1 Recent studies on GST activity and GSH concentration in gastrointestinal tract	12
2 Classification of glutathione S-transferase	19
3 Typical substrate and tissue specific expression of GSTs	24
4 DNA polymorphism in the <i>GSTP</i> gene	28
5 Grouping of GSTP variants	29
6 Genotype and gene frequencies of GSTP Ile105Val in different population	32
7 Genotype and gene frequencies of GSTP Ala114Val in different population	33
8 Association of GSTP Ile105Val polymorphism and individual susceptibility to some diseases	35
9 GSTP polymorphism and gastrointestinal diseases	37
MATERIALS AND METHODS	
10 Instruments for DNA extraction, DNA amplification and gel electrophoresis	38
11 Chemicals for DNA amplification and gel electrophoresis	39
12 Restriction endonucleases and thermophilic DNA polymerase	39
13 Primers for DNA amplification	40
14 The recognition site of restriction endonucleases used in this study.....	42
RESULTS	
15 Genotype and gene frequencies of GSTP Ile105Val and Ala114Val in Thai population	47
16 A test for genotype frequency equilibrium of GSTP Ile105Val and Ala114Val in Thai population	48
17 Endoscopic findings, sex and age of dyspeptic patients in this study.....	50
18 Genotype and gene frequencies of GSTP Ile105Val and Ala114Val in case and control study	50

LIST OF TABLES (Cont.)

Table		Page
19	Endoscopic findings, sex and age of dyspeptic patients (selected only Ala114 homozygotes)	51
20	Analysis of an association between the GSTP genotype at codon 105 and a risk to peptic ulcer disease	51
21	Analysis of an association between the GSTP genotype at codon 105 and a risk to peptic ulcer disease by stratified analysis	54
