

Nattanan Jewcharoensakul 2008: Opinions of Stake Holders towards Food Sanitation of Canteen in the Public Secondary Schools in Prachin Buri Province. Master of Arts (Home Economics Education), Major Field: Home Economics Education, Department of Vocational Education. Thesis Advisor: Assistant Professor Surachai Jewcharoensakul, Ph.D. 157 pages.

The objective of this research was to study sanitation management of canteen at the public secondary schools in Prachin Buri province. The population was the high school administrators, foods store entrepreneurs and students. Questionnaire and observation form were used for data collections. Data analysis had done by computer program. Frequency and percentage were used for statistical tool.

The result of the study revealed in 4 parts; 1) A half of the administrators paid attention to the school canteen sanitation. Three third of them had never provided sanitation training for the food stores entrepreneurs. Most of them reported about the schools canteen sanitation to the city and they expected to provide sanitation system to school canteens. 2) Most of the school canteen entrepreneurs were female, they had education less than grade 12 and less than a half of them were trained in the sanitation training program. Most of the school canteen entrepreneurs needed to have sanitation training, because they believed that sanitation system would be good for the student and their own children. 3) Most of the student had knowledge about sanitation in the moderate level and they believed that sanitation training was necessary, in order to be part in watching out the well sanitation system of the school canteen. 4) The observation, found that, most of the school had canteen had no washbasin and grease tab. The quality of foods was in the moderate level and the price was suitable. Serving equipments were suitable, but did not wash properly. Garbage was taken care well enough. The student didn't help to take care of school canteen well enough. Therefore the administrator needs to provide the sanitation training to the stake holder, which would benefit to all.
