ACKNOWLEDGEMENTS

I would like to express my deepest gratitude to Asst. Prof. Hataichanoke Niamsup, my supervisor, for her kind advice, supervision, encouragement, very thoughtful guidance, and great support throughout the course of this research. I also wish to express my sincere appreciation to Dr. Somkid Deejing, the chairman, and Dr. Jidapa Tinoi, the examining committee for their valuable comments and suggestion.

I am grateful to the Center for Innovation in Chemistry: Postgraduate Education and Research Program in Chemistry and PERCH-CIC, for the financial supports of my research, great opportunities, and invaluable experiences. Furthermore, I thank the Graduate School and Department of Chemistry, Chiang Mai University, for knowledge and facilities.

I would like to thank my senior, junior and my friends from Bitechnology Branch, the Department of Chemistry at Chiang Mai University, who have cheered me up, encouraged me, supported me, and gave very thoughtful comments on my study and research.

And last but most important, I am deeply indebted to my family, whose love, support and sacrifice are the source of the energy. I have to accomplish this goal.

Rattanaporn Thakaew
