

## ACKNOWLEDGEMENTS

It is my great pleasure to acknowledge the contributions of many individuals who helped me directly and indirectly in carrying out this research. Without their help and support, this research study could not have been successfully completed.

Firstly, I would like to express my grateful appreciation to my research adviser, Asst. Prof. Dr. Monnipha Somphong, who has spent her precious time providing me with guidance, knowledge and encouragement throughout this study.

I would also like to express my deepest thanks to my 2 year old daughter Flannery, and my 4 month old son Fynnegan, who I was breastfeeding throughout this study and who inspired me tremendously to successfully complete this research. Also, I'd like to express all my love and merit to my devoted husband Peter, who has supported me in every way possible and provided me with the inspiration, encouragement and strength to finish my paper.

Finally, thanks to all my friends, colleagues and the university administrator, Khun Siriwon, for their kind support and enthusiasm during this study and who helped whenever I needed support to complete this hard but rewarding research project.
