

ACKNOWLEDGEMENTS

The author wishes to express her utmost appreciation and gratitude to her advisor Assoc. Prof. Dr. Damrong Attaprechakul for his valuable guidance, critical suggestions and encouragement throughout the course of this study.

The author is extremely grateful to those who gave their valuable time, guidance and provided needed help throughout this study to improve her works and solve many problems. The author would like to express thanks to Miss Thitirat Ampai for her constructive suggestions and valuable ideas.

Grateful thanks are also extended to Mr. Deepak Bhopatkar for his generous help in providing sources of literature related to the study and tireless support. Many thanks also go to Mr. Vitoon Nil-Ubon for his kind processing of the SPSS analysis for the research data.

The author wishes to express special thanks to all the LITU staff, especially Khun Siriwon for her help and cooperation. Also, the author is grateful to her classmates, Miss Pathumwan Nambutr and Mrs.Chutima Ratanasatien, for their encouragement and suggestions.

Finally the author wishes to extend her gratefulness and heartfelt gratitude to her beloved family and lovely friends at AIT for their love, encouragement and various help to the end.
