

## **Acknowledgements**

Many people were very kind to help me in finishing this thesis. I would like to express my profound gratitude and appreciation to Associate Professor Dr. Kamon Budsaba, my thesis advisor, for his advice, encouragement and endless patience. Also, I would like to thank Associate Professor Dr. Andrei Volodin, my thesis co-advisor, for his dedication to help all parts of thesis.

Sincere thankfulness and great appreciation are also extended to Dr. Ramidha Srihera, the chairman, Assistant Professor Pranee Nilkorn and Dr. Supranee Lisawadi, the committee members, for their comments and suggestions. I would like to thank Dr. Chinnaphong Bumrunsup for her helpful advices. I also wish to thank all teachers who have taught me all along.

In particular, I would like to express my deep gratitude to my parents, brother, relatives, and friends for their encouragement and motivation throughout graduate study.

Finally, an acknowledgement belongs to the staffs in the Department of Mathematics and Statistics, Thammasat University, especially Mrs. Malai Kaewklin, for her help and support.

Miss Thuntida Ngamkham
