

## ACKNOWLEDGEMENT

Firstly, I would like to express my gratitude to my research supervisor, Assistant Professor Dr. Pisanu Sunthraraks whose suggestions and guidance paved the way for me to complete this work.

I acknowledge the university libraries for the uses of their collections. Without them this dissertation would have been difficult to be completed.

Lastly, I would like to thank my family for supporting me to pursue this degree. And most of all this work would not have been possible without the stimulating discussions and encouragements of my friend, Mr. Sorawut Norapoompipat, who enable me to finish this dissertation.

Ms. Kamdao Boonyarataphan
