

Lists of Tables

Table	Page
2.1 The chemical composition of LDL.....	8
2.2 Impact role of proatherosclerogenic and proinflammatory properties of oxLDL in vitro studies.....	11
2.3 Elevation of LOX-1 receptor levels <i>in vitro</i> and <i>in vivo</i> studies... ..	13
3.1 SOD activity: amount of each solution.....	45
4.1 Criteria of various degree oxidation of oxLDL.....	48
4.2 Showing the characterization of oxLDL in three different degrees of oxidation, lag phase is determined in the initial step of diene formation curve.....	49
4.3 Summarized data of SOD activity.....	70
A1 LOX-1 expression in DFO, EDTA, and BHT pretreatment groups.....	120
A2 Mean density/mm ² of p38 MAPK activity activated by various doses of oxLDL.	121
A3 Mean density/mm ² of p38 MAPK activity activated by various doses and degrees moderately and fully oxLDL in 0.3 mM EDTA pretreatment.....	122
A4 Mean density/mm ² of p38 MAPK activity activated by various doses and degrees moderately and fully oxLDL in 10 μ M DFO pretreatment.....	123
A5 Mean density/mm ² of p38 MAPK activity activated by various doses and degrees moderately and fully oxLDL in 100 μ g/ml BHT pretreatment.....	125
