

ACKNOWLEDGEMENT

I would like to express my sincere thanks to the following organization and individual who have contributed their time, energy, and great support in helping me accomplish my dissertation and guiding me through the valuable process of the doctoral study.

Thammasat University, the famous institution, for research funding.

Assistant Professor Dr. Tawanchai Jirapramukpitak, my major advisor, for his kindness in sharpening my idea and challenging me to develop and refine my thoughts to strengthen my study.

Assistant Professor Dr. Penkae Katemarn, my co-advisor, for her helpful guidance, valuable advice, and suggestion to support my study even she is very busy.

Associate Professor Chuthamane Suthisisang, Associate Professor Dr. Kongkiat Kulkantrakorn, and Assistant Professor Dr. Veeraya Paocharoen, the dissertation committee members for their kind contribution, guidance, encouragement and valuable comments to make my dissertation achievable.

All patients who participated in this study, for their contributions and well cooperation to make my dissertation possible.

All physicians, pharmacists, and nurses of the two study settings with special gratitude for their concern, friendship, their kindly providing convenience in data collection to support my study.

Mrs. Pakaratee Chaiyawat, my classmate at Thamamsat University, for her friendship, emotional support and the most valuable sharing of happiness over the year.

Dr. Sumalee Pornkitprasarn, my special friend at Thai FDA, for her valuable friendship, emotional support, constructive criticism, and helpful assistance to my dissertation.

Above of all, I would like to express my infinite thanks and appreciation to my parents and everyone in my family including my husband for their constant love, kindness, understanding, encouragement, and being constantly supportive to me during my study.
