

LIST OF TABLES

TABLE		PAGE
2.1	Chemical constituents found in <i>Piper chaba</i> Linn.....	17
2.2	Chemical constituents found in <i>Piper sarmentosum</i> Roxb.....	22
2.3	Chemical constituents found in <i>Piper interruptum</i> Opiz.....	25
2.4	Chemical constituents found in <i>Plumbago indica</i> Linn.	28
2.5	Chemical constituents found in <i>Zingiber officinale</i> Roscoe.....	29
2.6	Biological activities of <i>Piper chaba</i> Linn.....	41
2.7	Biological activities of <i>Piper sarmentosum</i> Roxb.....	46
2.8	Biological activities of <i>Piper interruptum</i> Opiz.	48
2.9	Biological activities of <i>Plumbago indica</i> Linn.	49
2.10	Biological activities of <i>Zingiber officinale</i> Roscoe.....	54
3.1	The summarized data of the investigated plant species which ingredients in Benjakul preparation were collected by folk doctors.	64
4.1	% Yields of the ethanolic extracts from the investigated spices.....	75
4.2	Percentage of survival cells (Mean \pm SEM) of four types of cancer cell lines (cervical cancer cell line [Hela], liver cancer cell line [HepG2], breast cancer cell line [MCF7], lung cancer cell line [COR-L23] treated with extract concentration 50 μ g/ml at exposure time 72 hrs (n = 6)	77
4.3	Cytotoxic activity (IC ₅₀ μ g/ml \pm SEM) of plant extracts against four types of cancer cell lines (Hela, HepG2, MCF-7 and COR-L23) and one type of normal cell line (MRC5) at exposure time 72 hrs (n=3).....	78
4.4	IC ₅₀ (μ g/ml) \pm SEM of the fractions from Benjakul preparation separated by vacuum liquid chromatography against COR-L23 at exposure time 72 hours (n=3).....	81
4.5	¹ H-NMR spectral data (500 MHz) of BENS1 in CDCl ₃ and CD ₃ OD.....	83
4.6	¹ H-NMR spectral data (500 MHz) of BENS2 in CDCl ₃ and CD ₃ OD.....	86

LIST OF TABLES (continued)

TABLE		PAGE
4.7	¹ H-NMR spectral data (500 MHz) of BENS3 in CDCl ₃	90
4.8	Cytotoxic activity (IC ₅₀ μg/ml ± SEM and μM) of isolated compounds against four types of cancer cell lines (Hela, HepG2, MCF-7 and COR-L23) and one type of normal cell line (MRC5) at exposure time 72 hr (n=3).....	95
4.9	HPLC conditions for analysis of ethanolic extract of Benjakul preparation.....	97
4.10	Parameters of quantitative evaluation for piperine and plumbagin	101
4.11	Validation of precision of the analytical method for piperine	103
4.12	Validation of precision of the analytical method for plumbagin	103
4.13	Validation of the accuracy of the analytical method for piperine.....	104
4.14	Validation of the accuracy of the analytical method for plumbagin .	105
4.15	Plumbagin and piperine contents of Benjakul extraxt after stored under accelerated condition (45 °C, 75% RH).....	106
