

ACKNOWLEDGEMENTS

I would like to express my sincere thanks to my adviser, Assistant Professor Tanom Tiensawangchai, for his great contributions to this research. Also I would like to thank all the teachers at LITU, my friends in MEC 10 who provided great support in distributing the questionnaires, as well as all of the respondents of this research.

Last but not least, I want to express my appreciation to my family who have always supported me in whatever I do. Thanks for being beside me all the time.
