

ACKNOWLEDGEMENTS

This research paper would not have been accomplished without the valuable guidance and advice of a number of people. I would like to acknowledge with very special thanks and appreciation to all concerned with the following mentions:

First of all, I would like to express my sincere appreciation to my advisor, Assistant Professor Dr. Ketvatee Porkaew. Without her helpful guidance and excellent encouragement, my endeavor to complete the research paper would likely not have been possible.

Second, I strongly thank the parents who participated in this study. My research paper would not have been completed if I did not have their full help and cooperation during the data collection period.

Last of all, I would like to express my deepest gratitude to my parents who make me know unconditional love. They are very supportive and patient with me. Many thanks also go to my friends and colleagues who always cheered me up.
