Abstract.....	iv
Acknowledgements.....	vi
List of tables.....	x
List of figures.....	xiii
List of abbreviations.....	xvii
Chapter	
1. Introduction.....	1
1.1 Liquid chromatography.....	1
1.1.1 Micellar liquid chromatography.....	2
1.1.1.1 Micelles.....	3
1.1.1.2 Principle of micellar liquid chromatography.....	8
1.1.1.3 Chromatographic behavior in MLC.....	9
1.1.2 Ion interaction chromatography.....	11
1.1.3 Liquid chromatography/mass spectrometry.....	16
1.1.3.1 Electrospray ionization.....	18
1.1.3.2 Ion-trap mass spectrometer.....	20
1.2 The parabens.....	21
1.3 The perchlorate.....	24
2. Literature review.....	26
2.1 Analytical methods for determination of parabens.....	26
2.1.1 Aims.....	34
2.1.2 Scope of this part.....	34
2.2 Analytical methods for determination of perchlorate.....	39
2.2.1 Screening methods.....	39
2.2.2 Confirmatory methods.....	41

Table of contents (Conts.)

	Page
2.2.2.1 Direct form.....	41
2.2.2.2 Ion-interaction (ion-pairing) formation.....	42
2.2.3 Aims.....	48
2.2.4 Scope of this part.....	48
3. Research methodology.....	49
3.1 Development of MLC method for parabens analysis.....	49
3.1.1 Instruments.....	49
3.1.2 Chemicals.....	51
3.1.3 Cosmetic samples and sample preparation.....	51
3.1.4 Preparation of standard solutions and other reagents.....	52
3.1.5 Procedures and methods.....	54
3.1.5.1 Preliminary study.....	54
3.1.5.2 Chromatographic behavior.....	55
3.1.5.3 Optimization of the MLC condition.....	55
3.1.5.4 Validation study.....	58
3.1.5.5 Application of the method in cosmetics.....	59
3.2 Development of LC-MS/MS method for perchlorate analysis.....	60
3.2.1 Instruments.....	60
3.2.2 Chemicals.....	61
3.2.3 Environmental samples and sample preparation.....	63
3.2.4 Preparation of standard solutions and other reagents.....	64
3.2.5 Procedures and methods.....	68
3.2.5.1 Investigation of ion-pairing reagent.....	68
3.2.5.2 Optimization of the LC condition.....	68
3.2.5.3 Optimization of the MS/MS condition.....	73
3.2.5.4 Validation study.....	74
3.2.5.5 Application of the method in environmental sample.....	78

Table of contents (Conts.)

	Page
4. Results and discussion.....	79
4.1 Development of MLC method for parabens analysis.....	79
4.1.1 Preliminary study.....	79
4.1.2 Chromatographic behavior.....	81
4.1.3 Optimization of the MLC condition.....	82
4.1.4 Validation study.....	84
4.1.5 Application of the method in cosmetics.....	87
4.2 Development of LC-MS/MS method for perchlorate analysis.....	94
4.2.1 Investigation of ion-pairing reagent.....	94
4.2.2 Optimization of the LC condition.....	100
4.2.3 Optimization of the MS/MS condition.....	109
4.2.4 Validation study.....	111
4.2.5 Application of the method in environmental samples.....	120
5. Conclusions.....	123
5.1 Development of MLC method for parabens analysis.....	123
5.2 Development of LC-MS/MS method for perchlorate analysis.....	124
References.....	127
Appendix.....	140
A. Cosmetic and environmental samples.....	141
B. Instrumentation.....	157
C. Results.....	160
Biography.....	180
