

Thuwanon Banpho 2006: Development of Web-Based Electronic Media Supporting Teaching and Learning of English in Grade Range 3. Master of Arts in Teaching, Major Field: Teaching English, Department of Education. Thesis Advisor: Associate Professor Somtawil Dhanasobhon, Ed.D. 188 pages.  
ISBN 974-16-1815-8

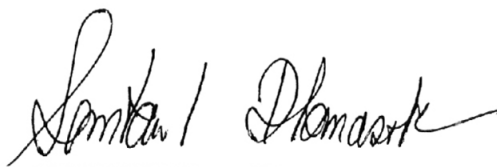

The purposes of this research were: 1) to construct Web-Based Electronic Media Supporting Teaching and Learning of English in Grade Range 3 and 2) to study students' and teachers' satisfaction towards Web-Based Electronic Media Supporting Teaching and Learning of English in Grade Range 3.

The sample groups were twenty-six English teachers and one hundred and fifty-eight Mattayomsuksa 1-3 students from eight schools in Khonburi District, Nakhonratchasima Education Area 3. The research tools were: 1) the CD-Rom of Web-Based Electronic Media Supporting Teaching and Learning of English in Grade Range 3, 2) the questionnaire of the satisfaction towards Web-Based Electronic Media Supporting Teaching and Learning of English in Grade Range 3, and 3) the survey and the interview forms. The researcher collected the questionnaires from the sample groups and analyzed the results using the mean score.

According to this research, the researcher got the Web-Based Electronic Media in the form of CD-ROM for 9 units and learned about the process of development of Web-Based Electronic Media for Supporting Teaching and Learning of English in Grade Range 3. The students and the teachers had high to highest satisfaction towards the use of Web-Based Electronic Media Supporting Teaching and Learning of English in Grade Range 3 in every part: content; technology and presentation; instructional media components; use; and application. The teachers highly agreed on the application of this media in stimulating English teachers to develop medias, activities, and teaching methods much more interesting and on the use of this media as supporting materials.
