

LIST OF CONTENTS

Chapter		Page
I INTRODUCTION.....		1
Background		1
Statement of the problem		4
Objectives.....		5
Scope of the Study.....		5
Benefits of the Study		5
II LITERATURE REVIEW.....		6
Introduction		6
Solar thermal power plant		7
Thermal Energy Storage system (TES).....		15
Heat transfer of storage system		34
Review of related research		53
III RESEARCH METHODOLOGY		59
Material properties.....		59
Temperature profile charging and discharging set up.....		61
Temperature distribution in radius set up		61
Calculation of thermal distribution performance		62
IV FINDINGS AND DISCUSSION.....		65
Temperature profile charging and discharging		65
Temperature distribution in Radius		72
Energy stored		77
Energy recovered		81
Energy efficiency		84

LIST OF CONTENTS (CONT.)

Chapter		Page
V CONCLUSIONS AND RECOMENDATION.....		87
REFERENCES.....		90
APPENDIX.....		99
BIOGRAPHY		118

LIST OF TABLES

Table		Page
1 Candidate Storage Media for SEGS Plants		29
2 Solid Storage Media for SEGS Plants		31
3 Liquid Storage Media for SEGS Plants		32
4 Latent Heat Storage Media for SEGS Plants.....		33
5 Properties of sodium chloride.....		51
6 Properties of Sodium nitrate.....		52
7 Properties of potassium nitrate		53
8 Properties of three NPCMs and lubricant oil		59

LIST OF FIGURES

Figure	Page
1 Principle of a solar thermal power plant.....	8
2 Molten salt power tower system schematic diagram	9
3 Solar two, the prototype power tower with 1926 mirrors.....	10
4 Molten salt storage tanks at Solar Two, California.....	11
5 The six 9 kWe dish/stirling operation on the Plataforma solar de Almeria	12
6 Principle of parabolic trough solar collector	14
7 Mismatch in the energy supply and energy demand.....	18
8 Storage of solar thermal energy	24
9 Schematic of a concentrated solar thermal trough power plant with thermal storage	26
10 A one-dimensional system in rectangular coordinates	35
11 Uniform flow past a heated plate	39
12 Heat flow through a cylinder with convection	40
13 One-dimensional heat flow through a hollow cylinder and electrical analog.....	42
14 One-dimensional heat flow through multiple cylindrical section and electrical analog.....	44
15 Essentials of mixed liquid storage systems	46
16 Fully mixed storage with heat exchangers	49
17 The model of experimental set up.....	60
18 The positions of thermocouple distribution in storage tank	60
19 Heat transfer oil temperature over time for three different NPCM configurations and temperature of HTF and storage medium in charging experiment at Flow rate (a) 0.58 kg/s., (b) 0.87 kg/s, (c) 1.16 kg/s and (d) 1.45 kg/s.....	67

LIST OF FIGURES (CONT.)

Figure	Page
20 Storage discharging fluid temperatures decreasing at Flow rate (a) 0.58 kg/s , (b) 0.87 kg/s, (c) 1.16 kg/s and (d) 1.45 kg/s.	70
21 The temperature of radial temperature profile of 3, 6 and 9 cm of NaCl, KNO ₃ and NaNO ₃ at flow rate (a) 0.58 kg/s, (b) 0.67 kg/s, (c) 1.16 kg/s and (d) 1.45 kg/s	73
22 Flow rates and radial thermal distribution for thermal energy storage (a) NaCl, (b) KNO ₃ and (c) NaNO ₃	76
23 Instantaneous (a) and cumulative (b) energy stored during the charging process for NaCl.....	79
24 Instantaneous (a) and cumulative (b) energy stored during the charging process for KNO ₃	80
25 Instantaneous (a) and cumulative (b) energy stored during the charging process for NaNO ₃	81
26 Flow rates of energy recovered in (a) NaCl, (b) KNO ₃ and (c) NaNO ₃	83
27 Variation of energy efficiency with bed temperature difference during discharging cycle in (a) NaCl, (b) KNO ₃ and (c) NaNO ₃	85

ABBREVIATIONS

HTF	=	Heat Transfer Fluid
TES	=	Thermal Energy Storage
NPCM	=	Non-Phase Change Materials
