

ACKNOWLEDGEMENTS

I would like to express my warm and sincere thanks to my advisor and the chairman of the thesis committee, Prof. Dr. Arayah Preechametta, for giving me the opportunity to discuss my dissertation topic from the very beginning and for patiently providing me with motivation and invaluable guidance throughout the process of writing this dissertation. I would also like to thank the members of the thesis committee for their constructive comments. In addition, I want to express my gratitude to Dr. Pedro Silos for sharing helpful insights and for his prompt response to my email questions.

Most importantly, I am grateful for the support from my wife. She has been critically involved in helping me collect data from different sources, develop important ideas needed to interpret and reconcile my model theoretical results with reality, handle all sorts of problems I had to go through over the course of writing this dissertation, and cheer me up from the most desperate moments. This dissertation would not have been possible without her wholehearted support.
