

LIST OF FIGURES

Figure		Page
1.1	Percentage of household by occupancy status in 2006	2
2.1	Average monthly household income & expenditure, and ratio of household debt to monthly income in 1996-2006	8
2.2	Thai household's age profile of debt to income during 2002-2004 ...	9
2.3	Housing tenure status – by age group (countrywide)	11
2.4	Housing tenure status – by age group (Bangkok)	11
2.5	Thailand's population pyramid in 2007	13
2.6	Thailand's population pyramid in 2025	13
2.7	Housing demand index for Bangkok and vicinities	14
2.8	Housing price index and CPI	19
2.9	Average selling price of housing in Bangkok and vicinities	20
5.1	Estimated capital share for Thailand for the period 1980-2002	51
5.2	<i>GDP</i> and the seasonally adjusted series	53
5.3	<i>N</i> and the seasonally adjusted series	53
5.4	Age profile of GINI coefficients	57
6.1	Value of $a_M(z)$, $b_M(z)$, $a_K(z)$, $b_K(z)$ from each iteration	66
6.2	Plot of aggregate labor and next-period aggregate business capital against current-period aggregate business capital when household's guess obeys equation (6.1) and (6.2)	67
6.3	Average housing-to-wealth ratio across age group – Household Socio-Economic Survey (2006) vs. Base case model	70
6.4	Average holding of housing capital across age group – Household Socio-Economic Survey (2006) vs. Base case model	73
6.5	Average holding of business capital across age group – Household Socio-Economic Survey (2006) vs. Base case model	74
6.6	Average housing-to-wealth ratio, housing capital, and business capital across age group – Base case model	75

Figure	Page
6.7 Average housing-to-wealth ratio, housing capital, and business capital across age group – Model without borrowing	81
6.8 Comparison of average housing-to-wealth ratio, housing capital, and business capital across age group – Model without borrowing vs. Base case model	82
6.9 Average housing-to-wealth ratio, housing capital, and business capital across age group – Model with large productivity shock	85
6.10 Comparison of average housing-to-wealth ratio, housing capital, and business capital across age group – Model with large productivity shock vs. Base case model	86
6.11 Average business capital across age group – Model without housing	89
6.12 Comparison of average business capital across age group – Model without housing vs. Base case model	89
6.13 Impulse responses in the model with housing capital – positive shock	113
6.14 Interest rate and wage rate in the model with housing capital – positive shock	114
6.15 Interest rate and wage rate in the model with housing capital – negative shock	115
6.16 Impulse responses in the model with housing capital – negative shock	116
6.17 Impulse responses to positive shock – with and without housing capital	117
6.18 Interest rate and wage rate in the model with and without housing capital – positive shock	118
6.19 Impulse responses to negative shock – with and without housing capital	119
6.20 Interest rate and wage rate in the model with and without housing capital – negative shock	119
