

## ACKNOWLEDGEMENTS

For the successful completion of this work, I would like to express my deepest gratitude and appreciation to whom I am indebted.

To Professor Dr. Wanpen Chicumpa, my advisor, for her kindness, teaching, supervision and encouragement. Without her virtues, this study would not have been accomplished.

I would like to express my sincere gratitude to my co-advisors, Associate Professor Dr. Pramuan Tapchaisri, Associate Professor Dr. Thaweesak Songserm, Assistant Professor Dr. Pongsri Tongtawe, and Assistant Professor Dr. Potjane Srimanote for their kind and valuable suggestions.

Special thanks to all members of the Molecular Immunology/Microbiology Laboratory, Ph. D. and M. Sc. Students of Graduate Studies, all staff of Graduate program, Faculty of Allied Health Sciences, Thammasat University, and also all staff and laboratory facilities of the Department of Parasitology, Faculty of Medicine, Siriraj Hospital, Mahidol University.

My gratitude also goes to Professor Dr. Antonio Ferrante, Children's Research Center, Immunopathology Department, Children, Youth and Women Health Service, School of Paediatrics and Reproductive Medicine, Faculty of Health Science, University of Adelaide, for allowing me to work in his laboratory such that I gained good experiences in Adelaide, South Australia.

The research grants from the Commission on Higher Education, Ministry of Education, the Thailand Research Fund (TRF), the National Research Council of Thailand (NRCT) and the BIOTEC, NSTDA, Thailand, given to Professor Dr. Wanpen Chaicumpa, my principal dissertation advisor, which some amounts have been used for this study, are appreciated with grateful thanks.

Finally, I also would like to express my deepest gratitude and appreciation to my beloved parents for their love and care.
