

List of figures

Figures	Page
1. The mycobacterial cell wall structure	3
2. Mycolic acid structure	4
3. Mycolic acids in <i>Mycobacterium tuberculosis</i>	5
4. Trehalose dimycolate	6
5. Common structure of acetylate peptidoglycolipid	6
6. The first-line tuberculosis drugs	9
7. The second-line tuberculosis drugs	10
8. The third-line tuberculosis drugs	11
9. Deazapteridines analogs	15
10. Toluidine derivatives	16
11. 2-Chloro-4(2-furanyl)-9-benzylpurine	16
12. Fulleropyrrolidines	17
13. Thiolactomycin and analogs	18
14. 2-(5-Nitro-2-furyl)-1,3,4-thiadiazole derivatives	19
15. Tryptanthrin and analogs	20
16. Tetramethylpiperidino phenazines	21
17. 1,2,3 –Triazoles analogs	22
18. Dithiocarbamate and dithiocarbonate derivatives	22
19. Acridine and their derivatives	23
20. Tetrahydroacridines derivatives	24
21. Phenoxyacetic acid derivatives	25
22. 1,3,4-Oxadiazoles	26
23. Thiosemicarbazone derivatives	27
24. Benzothiazolo naphthyridone carboxylic acid derivatives	28
25. Piperidinol derivatives	29
26. Quinoline derivatives	29
27. 1,4-Di- <i>N</i> -oxide-3-methylquinoxaline-2-carboxylic acid	31
aryl amide derivatives	
28. Mefloquine and analogs	33

29. Rhizome of <i>Alpinia galangal</i>	44
30. 1'S-1'-acetoxylchavicol acetate	46
31. The structure of <i>N</i> -formyl- α '-(2,4,6-triethylphenyl)-L-proline.....	58
32. Structure of saccharose and β -cyclodextrin.....	60
33. Bisimidazole- <i>N</i> -oxides	61
34. Novel compounds	97
35. The structure of active ACA analogs of this series.....	103
36. Summary of the effect of chloride atom at different positions	104
of benzene ring	
37. Summary of the effect of alkyl substitution at position 1' of	105
chavicol analogs
