

ACKNOWLEDGEMENTS

This thesis would not be accomplished without the kindness of my advisor, Dr. Sugunya Utaida. I am grateful to my advisor who gave good advices for me and guided me to complete my study. She helped to design the experiments, checked, and corrected all the flaw of my thesis. I would like to absolutely thank to Dr. Suwana Trakulsomboon who gave me good guidance in the beginning of the experiment. My special thanks are for Dr. Gun Anantasomboon, Faculty of Science at Rangsit University, Mr. Thavornsak Sabsomboon, Electron Microscope Unit, Department of Pathology at Ramathibodi Hospital, and Dr. Sirinun Pongmayteegul for helping in everything in part of transmission electron microscope experiment. I am sincerely thankful to Dr. Sutthirat Sitthisak and Dr. Kulwadee Phannachet for good comments and suggestions.

I would like to thank staff members of the Department of Biotechnology at Thammasat University for their help in providing facilities and materials for my thesis experiments.

Finally, my graduation would not be achieved without blessing from my parents, who help me in everything and always provide me with their greatest willpower and financial support the completion of my study. My last appreciation goes to my friends for their help and encouragement.

Miss Sutanya Jongutsa
Thammasat University
