Abstract	i
Acknowledgement.....	ii
List of Tables.....	vii
List of Figures.....	viii
 Chapter	
1. Introduction.....	1
Rational.....	1
Objective.....	3
Research Methodology.....	3
2. Literature Reviews.....	4
2.1 <i>Staphylococcus aureus</i>	4
2.2 <i>S. aureus</i> cell walls.....	6
2.2.1 Synthesis of peptidoglycan.....	8
2.2.3 Pathogenesis of <i>S. aureus</i>	10
2.2.4 Treatment and antibiotic resistance.....	11
2.2.4.1 Methicillin resistance.....	11
2.2.4.2 Vancomycin and resistance.....	13
2.2.4.2.1 History.....	13
2.2.4.2.2 Toxicity.....	13
2.2.4.2.3 Mechanism of action.....	14
2.2.4.2.4 Vancomycin resistance.....	15
2.2.4.2.5 Cell wall thickening.....	17
2.2.4.2.6 Autolysins in staphylococci.....	19

2.5.7 New antibiotic against vancomycin resistance.....	21
3. Materials and Methods.....	22
3.1 Bacterial strains and growth conditions.....	22
3.2 Obtaining of laboratory-derived strains with decreased susceptibility to vancomycin.....	22
3.3 Susceptibility testing.....	23
3.4 Population analysis.....	23
3.5 Whole cell autolysis assay.....	24
3.6 Zymographic detection of autolysins.....	24
3.6.1 Extraction of crude autolysins.....	24
3.6.2 Protein concentration determination.....	25
3.6.3 Autolysin profiles by zymography.....	25
3.7 Transmission electron microscopy.....	25
4. Results and Discussion.....	27
4.1 Passage selection of laboratory-derived VISA and drug susceptibility testing.....	27
4.2 Population analysis profiles of the laboratory-derived VISA strains.....	28
4.3 Whole cell autolytic activity profiles.....	31
4.4 Effects of vancomycin on whole cell autolytic activites.....	32
4.5 Autolysin profiles of laboratoyr-derived VISA and parental strains.....	42
4.6 Effects of vancomycin on autolysin profiles.....	42
4.7 Cell wall Morphologies of VISA derivatives and VSSA strains.....	49
5. Conclusion.....	56
References.....	59
Appendix.....	65

Equipments and Chemicals.....	66
Biography.....	70

LIST OF TABLES

Table	Page
3.1 VSSA strains used in this study.....	23
3.2 Laboratory-derived strains used in this study.....	23
4.1 Vancomycin MICs of VSSA.....	27
4.2 Vancomycin MICs of laboratory-derived hVISA and VISA strains	28
4.3 AUC values of the laboratory-derived hVISA svrains (MICs of 4 µg/ml)..... and laboratory-derived VISA strains (MICs of 7 µg/ml) and AUC ratios	31
4.4 Cell wall thickness of VISA derivatives and their VSSA strains.....	51

LIST OF FIGURES

Figure	Page
2.1 Golden colonies of <i>Staphylococcus aureus</i>	5
2.2 Coagulase test of <i>Staphylococcus aureus</i>	6
2.3 Topography of cell wall structure of <i>Staphylococcus aureus</i>	7
2.4 Structure of muropeptide components.....	8
2.5 Peptidoglycan synthetic pathway in <i>Staphylococcus aureus</i>	9
2.6 Structure if vancomycin molecule.....	14
2.7 Transmission electron microscopy of vancomycin susceptible <i>Staphylococcus aureus</i> and vancomycin resistant strain.....	18
4.1 Population analysis profiles of the laboratory-derived hVISA and VISA strains.....	30
4.2 Whole cell autolytic activity profiles of laboratory-strains VISA KY-8, KY-8-1 and their parental strain KY.....	34
4.3 Whole cell autolytic activity profiles of laboratory-derived strains SS-8, SS-8-1 and their parental strain SS.....	35
4.4 Whole cell autolytic activity profiles of laboratory-derived strains UH7-8, UH7-8-1, and its parental strain UH7.....	36
4.5 Whole cell autolytic activity profiles of laboratory-derived strains UH9-8..... UH9-8-1, and their parental strain UH9.....	37
4.6 Whole cell autolytic activity profiles of laboratory-derived VISA UH35-8, UH35-8-1, and their parental strain UH35.....	38
4.7 Whole cell autolytic activity profiles of VSSA in the absence, and presence of vancomycin.....	39
4.8 Whole cell autolytic activity profiles laboratory-derived hVISA..... (MICs of 4 µg/ml) in the absence and presence of vancomycin.....	40
4.9 Whole cell Autolytic activity profiles laboratory-derived VISA..... (MICs of 7 µg/ml) in the absence and presence of vancomycin.....	41
4.10 Autolysin zymograms of KY, SS, and their hVISA derivatives	44
4.11 Autolysin zymograms of UH7, UH9, and their hVISA derivatives	45

4.12 Autolysin zymograms of Mu3, UH35, and their hVISA derivatives with.....	46
4.13 Autolysin zymograms of KY, SS, and their VISA derivatives with.....	47
4.14 Autolysin zymograms of UH7, UH9, and their VISA derivatives with.....	48
4.15 Autolysin zymograms of Mu3, UH35, and their VISA derivatives with.....	49
4.16 Transmission electron micrographs of VISA derivatives KY-8-1..... and its parental KY.....	52
4.17 Transmission electron micrographs of VISA derivatives SS-8-1..... and its parental SS.....	53
4.18 Transmission electron micrographs of VISA derivatives UH7-8-1..... and its parental UH7.....	54
4.19 Transmission electron micrographs of VISA derivatives UH9-8-1..... and its parental UH9.....	55
