

ACKNOWLEDGMENTS

I would like to take this opportunity to express my sincere gratitude to all those who have contributed to the fulfillment of this study. Firstly, I would like to express my deepest appreciation to my advisor, Associate Professor Suree Kongsomjit, for her guidance and invaluable advice throughout this research project.

I am also very grateful to all my colleagues for their help in distributing the questionnaires. High appreciation is given to the respondents of the questionnaires who are non-academic staff at KMUTT. Their kind cooperation made this study possible.

Lastly, I would like to thank my family and friends for their encouragement and support during my study.
