

Taveechai Saeju 2014: Skilled Workers in the Metal Industry, Turner Type Metals in Bang Kho Laem, Bangkok. Master of Arts (Social Development and Administration), Major Field: Social Development and Administration, Faculty of Social Sciences.

Thesis Advisor: Mr. Phayap Phyormyont, M.A. 175 pages.

This study aimed to identify independent variables. General information of respondents, characteristics of the establishment. Feature of the labor demand and factors related to employment. And variable according to the needs of Entrepreneurs in the Metal Industry, Turner Type Metals in Bang Kho Laem, Bangkok. 295 Samples of the total population data collected by questionnaire. The statistics used in data analysis is descriptive statistics test the difference using t-test and F-test for the difference is the methods using a pair of Scheff'e determine the level of statistical significance at the 0.05 level.

The results showed that the Labor demand , most were male (88.81), age 15-20 years (58.31) and Single (78.31) Number of employees 1,335 people need education level 3 482 (36.10) Employees who need skilled technicians lathe 540 (38.60) operators are demanding most people need 1-4 workers any field staff (77.97) to a branch by branch mechanic (21.34 percent ) to experience (59.32) 3-year period . (35.12)

Factors relating to the employment of skilled labor, including the quality of knowledge, skills, expertise (56.95) and the need for skilled workers found that the average labor demand is moderate. Because labor productivity demand for products and services of enterprises are moderate. Wage rates and product costs affect employment less. As a result, the demand for labor Turner metals is moderate compared to the different factors relating to the employment needs skilled workers. Labor demand in the lathe. Demand for goods and services Number of technology entrepreneurs wage labor costs and little found no difference. Therefore reject the hypothesis.
