

ABSTRACT

Title of Research Paper : Efficiency of the Tambon Administration
Organizations : A Case Study of Trakarnphutphon
District, Ubonratchathani Province

Author : Mr. Monchai Kaweenathayanon

Degree : Master of Arts (Social Development)

Year : 2001

The objectives of the research were stated below :

1. to find out the efficiency of the tambon administration organizations in Trakarnphutphon District, Ubonratchathani Province,
2. to point out the factors affecting their efficiency, and
3. to use the findings to determine some ways to improve the operation of tambon administration organizations.

A questionnaire was employed to collect the data from 97 executive members of the tambon administration organizations. Percentage, mean, t-test and F-test were used for data analysis.

The findings were summarized as follows :

1. Most of the executive members of the tambon administration organizations were males, aged 40-49. They finished secondary education. They were farmers and earned less than 5,000 baht a month. They were members of tambon administration organizations and worked for the organizations for 1-5 years.
2. They were found to have a moderate knowledge and understanding about the roles and functions of the tambon administration organization.

(4)

3. The tambon administration organization were found to have high efficiency. The highest mean belonged to performance evaluation, followed by planning, decision-making, and budget administration, respectively.

4. The factors affecting the work efficiency of the members of the tambon administration organizations were education and knowledge and understanding about the roles and functions of the tambon administration organization.

5. Sex, age, occupation, monthly income, position and work experience in the tambon administration organization were all found to have no impact on the efficiency.
