

ABSTRACT

Title of Research Paper : Working Procedure and Servival Condition of AIDS Patients' Will Power Creative Group in Kanthalux District . Sisaket Province.

Author : Miss Puangpet Chotdilok.

Degree : Master of Arts (Social Development)

Year : 2001

The objectives of this research are to study the survival procedure, problems and obstacles including prospects for survival of the AIDS patients' will power creative group by using the qualitative methods of in-depth interview of 18 key informants who are members of committees and people involved with the AIDS group. Data analysis is done by logical context description plus descriptive statistics of frequency, percentage and mean.

Findings of the study can be summarised as follows : The group's survival condition appears to be in the satisfactory level, i.e., the group can serve it's objectives and members 'needs well; it's working procedures and management are well organized and systematically done as a group ; members can participate in group activities fully. The group can rely on it's resources satisfactorily

Problems and obstacles for it's existence are inadequate fund for the group activities , ill health of it's members because of AIDS, and others. Even that the group's prospect for survival is high because every member of the group wants it to exist to serve them as a spiritual center to boost their will power to fight against AIDS.

Recommendations emerged from this study, among others, are the government and private agencies should provide more fund to support the group's activities, training for better group performance.
