---

The study of the role of Yala Municipality on environmental management objected to examine the role of Yala municipality on Yala community environmental and people' opinions and satisfaction on rubbish disposal and wastewater treatment system.

The Study of Rubbish Disposal and Wastewater Treatment System, The Municipality Development Plans were employed for the secondary data. On the other hand, a questionnaire was employed to collect the primary data from 150 household in Yala municipality

**The study found that**

1. The Yala municipality has 10 plans and 1 project for its environment with budget 336,060,000 Baht. The plans directly relate to Yala province policies and Yala municipality policies. The academic and plans department has taken a responsibility to evaluate the plans and submits the results to the Yala committee.

2. Most of respondent's for people' opinion and satisfaction on a rubbish disposal and wastewater treatment system were female, during 20-30 years of age who has a bachelor's degree and had salary more than 5,000 Baht. It was found that the respondent agreed about a rubbish disposal in hinge level but the behavior level on a rubbish disposal was moderate. It also found that most responders' satisfaction level on Yala municipality's rubbish disposal was moderate. Nearly 96.37 % agreed that it is necessary to have a wastewater treatment for Pattani River and agreed that wastewater from houses hotels and factories has to be controlled. Nearly all of the responders agreed that government, local and private organisations should collaborate each other to solve the environmental problems concerning to the proposal of. The amen the of

Pattani Rims Conservation and 96 % of responders agreed that Yala municipality must have a wastewater treatment project.

#### **Recommendation**

1. Any municipality plan have to consider on people need and should survey people` opinions. People should have a participation in the plan.
2. Should have a program about environment in school and should build up the conscience of environment to children.
3. Any project or plan should consider on environment
4. A municipality should control wastewater and should proceed the wastewater Treatment system.
