

ABSTRACT

Title of Research Paper : The Evaluation of Public Health Middle Management Course Training in Ubonratchathani Province for The Year 2000

Author : Mrs. Reamrart Rucksamerwong

Degree : Master of Arts (Social Development)

Year : 2001

The study of “The Evaluation of Public Health Middle Management Course Training in Ubonratchathani Province for The Year 2000” had two following objectives:

1. to evaluate Public Health Middle Management Course Training by considering the main objectives of the project,
2. to evaluate the advantages of the project/course to trainers work by emphasizing with the objectives of each subject within the courses and applying the knowledge they received and changing their work behavior.

The sample used in this study consisted of 57 nurse chiefs, general administrative chiefs in community hospitals and assistance chiefs in Health Public Office in Ubonratchathani Province. The data were collected by using questionnaires. The statistics employed for data analysis were frequency, percentage, mean and standard deviation.

Results

1. Most sample were female (70.2%), age between 41-50 years, completed

bachelor degree, working period more than 10 years, income between 15,000 – 20,000 baht and being in the administrative position.

2. It was found that the course objectives were appropriated at a high level.

The subject in each group could be applied with their work. It was found that applying subjects in the following groups : 1) Organization Development and Instructor Supporting Administrative Work, 2) Improving and Increasing Vision of Manager and 3) Self Development by improving administrator were at a moderate level. However, the role of seven factors in management behavior was at a good level. Other comments including tour study, study period of model event and training was found to be the most appropriate.

Suggestion

1. Courses should be adjusted their structure according to group of students in the area of updating the information in each subject and number of subjects in each course.
2. Courses monitoring should be employed.
3. The target group should be improved by selecting from different occupations.
4. Every group in management level should receive the training.
5. The target group should be asked about their need before the training.
6. Every trainer should receive the revision of management knowledge.
7. The study tour should be set in every part of Thailand especially in the successful government hospital.
