

Abstract

The study entitled “Roles of the Best Practice Tambon Administration Organization (TAO) to expand the Implementation of the Community Based Rehabilitation (CBR) Project of Ministry of Social Development and Human Security : A Case Study of Nakornsawan Province” is aimed to study the implementation of the Best Practice TAO for promoting and supporting CBR activities, the opinion of personnels of the Best Practice TAO to expand CBR project implementation. The survey was conducted to obtain information from 175 TAO administrators and staffs (19 TAO) in Tha Ta Ko District and Nongbua District, Nakornsawan province, the pilot area of CBR project. The questionnaire and in-depth interview are used for collecting data and analyze by percentage, mean, standard deviation, t- test and F – test at 0.05 significant level. The result of the study are as follow.

The sampling are male, aged between 30 – 40 years old with educations at the level bachelor's degree and working with TAO, have salary between 8,001 - 11,000 baht and have experience in the people with disability work between 3 – 4 years. It is found that the Best Practice TAO which promoted and supported CBR activities is at high level especially in the budget support for the provision of social welfare services for people with disabilities. The opinion of the Best Practice TAO personnels about their roles of the expansion of the CBR Project implementation is at high level. The test on relationship were found that the different age, education level and position affected the promotion of CBR project implementation. The different work experience of TAO personnels affected the opinion of the expansion of CBR project implementation. The result of the TAO representative interview was found that this project is very useful. TAO is ready to support budget and community plan is the important mechanic to expand CBR project implementation to be continuous and sustainable.

It is recommended that TAO should have the direction for implementing and developing the quality of life of people with disabilities and should have the good administration system especially in controlling and monitoring.
