

ACKNOWLEDGMENTS

This research study could not have been successfully completed if I had not received sincere assistance and support from many people. I would like to take this opportunity to express my gratitude to all of them.

First of all, I wish to express my grateful appreciation to my research advisor, Dr.Pattama Sappapan, for her guidance and sincere interest in my work. Her suggestions and attentive assistance have beneficially shaped its overall structure.

I would like to thank all sales representatives of Abbott Laboratories, diagnostics division, and my colleagues for their help in the distributing and collecting of questionnaires.

Special thanks go out to my beloved customers who gave me useful comments on the designed questionnaires. I would like to express my special gratitude to all laboratory managers for their useful advice and kind cooperation in completing the questionnaires.

Finally, I would like to thank my family and lovely friends at the Language Institute, Thammasat University for their cheerful encouragement and inspiration throughout all the courses in the English for Careers Program.
