

ACKNOWLEDGEMENTS

This independent study could not have been completed without the assistance of many individuals. First of all, I would like to thank Asst. Prof. Preeyachat Uttamayodhin, my advisor, for valuable comments and guidance for this study.

I would like to thank my colleagues for their support in terms of facilitating the data collection process. The productive responses they gave made the completion of this study possible. Finally, I am also deeply grateful to my family and my supervisors for their understanding and encouragement.
