

## **ACKNOWLEDGMENTS**

This study could not have been completed without kind assistance from many people. I would like to take this opportunity to express my appreciation to all of them. First, I would like to thank Dr. Supanee Javarak-Apimas who gave me useful guidance in the scope of study and constructing the study instrument. Next, I would like to thank my adviser, Asst. Prof. Sucharat Rimkeeratikul, for giving me valuable recommendations and guidance throughout this study.

Last, but most important of all, I would like to thank my colleagues and some classmates who helped me distribute the questionnaire. Their support and encouragement helped me accomplish this study.
