

## ACKNOWLEDGMENTS

This study would not have been successful without the support of many kind people. First of all, I would like to express my sincere gratitude to Assistant Professor Virasuda Sripayak for her useful advice and recommendations as well as kind assistance in editing this research report. In addition, my thanks go to other instructors and officials of Thammasat University Language Institute who kindheartedly helped with the distribution and collection of the questionnaires to the students who voluntarily participated in this study. Without these people, the completion of this research may not have been possible.

Next, I am also grateful for my classmates' support, especially Sirigul Worrawattanakijcharoen and Chirdkanya Ariyapinyo, as they gave me a great deal of excellent support and encouraged me to complete my study. Moreover, my special thanks go to Ratanaphon Santiphakorn who is always by my side to inspire and motivate me to succeed in my hard study. Last but not least, I would like to give thanks for the never-ending encouragement from my parents who have supplied me with infinite power in pursuit of another accomplishment in my life.
