

ACKNOWLEDGEMENTS

I would like to thank my advisor, Ajarn Supanee Jivasak-Apimas, who has provided generous and helpful comments and suggestions to make this study complete. I would also thank colleagues at Siriraj Hospital for cooperation in answering questionnaires and giving useful information. I also extend my special thanks to Professor Jariya Lertakayanamee for her help in translating the questionnaire, and valuable guidance about way of life. Furthermore, I would like to thank all of my fellow classmates for their encouragement during the study.

Lastly I would like to express my profound attitude to my father, my mother, and my husband, who all always love and support me in every circumstance.
