

## ACKNOWLEDGEMENTS

I would like to express my deepest gratitude and appreciation to my adviser: Assoc. Professor Supong Tangkiengsirisin for his supervision, guidance and encouragement.

I wish to thank to all members in my office, the Environmental Education Section, particularly Ms. Phuaengladda Duankhun and Ms. Kantida Chiangthong for assistance in data collection and management. I would like to thank Ms. Ratchanee Thanawadee for her inspiration on the research topic. In addition, I appreciate to Khun Apiwat Klongnawa who introduced the MA Careers program to me.

I thank my family, Dad, Andrew, Nhon, Khanun, Nont and Nhuea for their morale. And most importantly, I thank my mom who has been the main supporter to my life and my education. Without her support, suggestion, kindness and care I would not have overcome the obstacles. I would like to send my special appreciation to my parents for the understanding of everything that I did and decided to do.

Finally, I would like to express gratitude to the Department of Environmental Quality Promotion and the Language Institute for their support.
