<b>ACKNOWLEDGEMENTS</b>	i
<b>ABSTRACT</b>	ii
<b>CONTENTS</b>	vi
<b>LIST OF TABLES</b>	xiii
<b>LIST OF FIGURES</b>	xiv
<b>LIST OF ABBREVIATIONS</b>	xviii
<b>CHAPTER</b>	
<b>I    INTRODUCTION</b>	1
<b>II   OBJECTIVES</b>	3
<b>III  LITERATURES REVIEW</b>	4
1. Biology of <i>Fasciola</i> spp.	4
1.1 Definition and Classification of <i>Fasciola</i> spp.	4
1.2 Geographic distribution of <i>Fasciola</i> spp.	4
1.3 Life cycle and Morphology of <i>Fasciola</i> spp.	9
2. Pathology, pathophysiology and clinical manifestation	14
3. Immunology of the host-parasite relationship in fasciolosis	15
3.1 Immune response of the host against parasite during <i>Fasciola</i> spp. infection	15
3.2 Mechanism of immune evasion/ modulations strategies of <i>Fasciola</i> spp.	18
4. Control of fasciolosis	24
4.1 Anthelmintics	25
4.2 Alternative adjunct control strategies	26
5. Essential antigen for vaccine development against fasciolosis	26
5.1 Fatty acid binding protein (FABP)	27

## CONTENTS (Cont.)

	<b>Page</b>
5.2 Glutathione S-transferase (GST)	28
5.3 Cathepsin L (CatL)	29
5.4 Haemoglobin	29
5.5 Paramyosin	30
5.6 Kunitz-type serine proteinase inhibitor (KTM)	30
5.7 Saposin-like proteins (SAPLIPs)	31
5.8 Leucine aminopeptidase (LAP)	31
6. Legumain-like-family	32
6.1 Asparaginyl endopeptidases	35
6.2 GPI: protein transamidases	39
<b>IV MATERIALS AND METHODS</b>	<b>41</b>
1. Screening of a cDNA library with a legumain conserved probe and analysis of the sequences of FgLGMN-1 and FgLGMN-2 isolated from a cDNA library of adult <i>Fasciola gigantica</i>	41
1.1 Production of recombinant LGMN cDNAs	41
1.2 Cloning of the PCR products of highly conserved regions of the legumain family and transformation of a host bacterial strain with recombinant plasmids	44
1.3 Construction and labeling of legumain conserved probe	46
1.4 Immobilization of bacteriophages onto nitrocellulose membrane	48
1.5 Hybridization of FgLGMN-1 and FgLGMN-2 probes onto nitrocellulose membrane and detection	50

## CONTENTS (Cont.)

	<b>Page</b>
1.6 Converting $\lambda$ TriplEx2 phage genome to pTriplEx2 phagemid vector	52
1.7 Purification of plasmid DNA from <i>E. coli</i>	52
1.8 Sequencing and sequence analysis	54
2. Characterization of FgLGMN-1 and FgLGMN-2 genes in various developmental stages with respect to the isotypes and gene expression	54
2.1 Preparation of different developmental stages of <i>F. gigantea</i>	54
2.2 Isolation of genomic DNA	55
2.3 Isolation of total RNA	56
2.4 Construction, labeling and efficiency analysis of FgLGMN-1 and FgLGMN-2 DNA probes	57
2.5 Southern hybridization analysis	58
2.6 Northern hybridization analysis	60
2.7 Stage-specific Reverse Transcriptase Polymerase Chain Reaction (RT-PCR)	60
3. Detection of FgLGMN-1 and FgLGMN-2 transcript distributed in the tissues of <i>F. gigantea</i> at different developmental stages	61
3.1 Tissue preparation	61
3.2 Labeling RNA probes by <i>in vitro</i> transcription using DIG RNA Labeling Mix	62
3.3 Determination of labeling efficiency	63
3.4 <i>In situ</i> hybridization	65
4. Expression, purification of recombinant FgLGMN- 1 and FgLGMN-2 proteins and antibody production	66

**CONTENTS (Cont.)**

	<b>Page</b>
4.1 Production of recombinant FgLGMN-1 and FgLGMN-2 genes	66
4.2 Cloning of the FgLGMN-1 and FgLGMN-2 into expression vector and transformation of <i>E. coli</i> with recombinant plasmids	67
4.3 Expression and purification of recombinant FgLGMN-1 and FgLGMN-2 proteins	70
4.4 Analysis of recombinant proteins by Sodium dodecyl sulfate-polyacrylamide gel electrophoresis (SDS-PAGE)	74
4.5 Production of polyclonal antibodies against the recombinant FgLGMN-1 and FgLGMN-2 proteins	75
5. Characterization of FgLGMN-1 and FgLGMN-2 proteins	76
5.1 Preparation of crude <i>F. gigantea</i> extracts (CWA <sub>g</sub> ).	76
5.2 Preparation of excretory-secretory products (ESA <sub>g</sub> ) from <i>F. gigantea</i>	76
5.3 Measurement of protein concentration	76
5.4 Analysis and characterization of recombinant proteins and native proteins	77
5.5 Analysis of immune response from <i>F. gigantea</i> infected mice against recombinant proteins	78
5.6 Deglycosylation of native legumains with N-Glycosidase F	78

## CONTENTS (Cont.)

	<b>Page</b>
6. Immunolocalization of native proteins in tissues of 4-week old juvenile and adult parasites by using rabbit anti-rFgLGMNs polyclonal sera	79
6.1 Removal of paraffin and rehydration	79
6.2 Antigen retrieval-unmasking of antigen	79
6.3 Inactivation of endogenous peroxidase	79
6.4 Primary antibody reaction	80
6.5 Secondary antibody reaction	80
6.6 Color development	80
7. Autocatalytic processing and functional assay of recombinant FgLGMN and native proteins	81
7.1 Refolding of recombinant FgLGMN proteins	81
7.2 Autocatalytic processing of recombinant FgLGMN proteins	81
7.3 Hydrolysis of a synthetic peptide substrate	81
7.4 Legumain activity assay of native parasite extracts	82
7.5 Legumain inhibitor sensitivity assays	82
<b>V RESULTS</b>	<b>83</b>
1. Screening of cDNA library with a legumain conserved probe and analysis of the sequences of FgLGMN-1 and FgLGMN-2 isolated from a cDNA library of adult <i>Fasciola gigantica</i>	83
1.1 PCR amplification and cloning of recombinant FgLGMNs	83
1.2 cDNA library screening for full-length FgLGMNs	83
1.3 Nucleic acid sequences analysis	84

## CONTENTS (Cont.)

	<b>Page</b>
1.4 Protein sequence characterization and phylogenetic relationships with orthologous LGMNs	93
2. Characterization of FgLGMN-1 and FgLGMN-2 genes in various developmental stages with respect to the isotypes and the gene expression	103
2.1 Southern hybridization analysis of <i>F. gigantea</i> genomic DNA with DIG-labeled LGMN-1 and LGMN-2 probes	103
2.2 Gene transcription analysis by Northern hybridization and RT-PCR in different developmental stages of <i>F. gigantea</i>	106
3. Detection of FgLGMN-1 and FgLGMN-2 transcripts distributed in the tissues of <i>F. gigantea</i> at different developmental stages	111
4. Expression, purification of recombinant FgLGMN-1 and FgLGMN-2 proteins and antibody production	120
4.1 Subcloning of the FgLGMN cDNAs into the pET20b(+) prokaryotic expression vector	120
4.2 Expression of recombinant FgLGMN proteins in a prokaryotic expression system (pET20b+)/BL21pLysS) and purification	123
4.3 Production of polyclonal antibodies against the recombinant FgLGMN-1 and FgLGMN-2 proteins	131
5. Characterization of FgLGMN-1 and FgLGMN-2 proteins	132

**CONTENTS (Cont.)**

	<b>Page</b>
5.1 Detection of immune response against recombinant FgLGMNs in <i>F. gigantica</i> -infected mice	132
5.2 Immunological characterization of recombinant FgLGMNs and native proteins by using rabbit immune sera against recombinant proteins	135
5.3 N-glycosylation analysis of native FgLGMNs	139
6. Immunolocalization of native proteins in tissues of 4-week old juvenile and adult parasites by using rabbit anti-rFgLGMNs polyclonal sera	142
7. Autocatalytic processing and functional assay of recombinant FgLGMNs and native proteins	147
7.1 Autocatalytic processing and functional assay of recombinant FgLGMN proteins	147
7.2 Legumain activity and inhibition sensitivity assays from adult <i>F. gigantica</i> antigens	150
