ACKNOWLEDGEMENTS

This research is under the joint degree program (cotutelle) between Laboratoire d'Informatique pour l'Entreprise et les Systèmes de Production (LIESP), Université Lumière Lyon 2, France and College of Arts, Media and Technology (CAMT), Chiang Mai University, Thailand. Thus, I owe my advisors the deepest gratitude, Prof. Dr. Abdelaziz Bouras (Université Lumière Lyon 2) and Prof. Dr. Nopasit Chakpitak (Chiang Mai University), whose encouragement, guidance and support enabled me to develop an understanding of the subject from the initial to the final level. Moreover, they opened my world not only to the research aspect, but also international collaborations, which are valuable by-products of my thesis.

Then, I am very grateful for the co-supervision from Assoc. Prof. Dr. Yacine Ouzrout (Université Lumière Lyon 2) and the follow-up as well as co-advising for Asst. Prof. Dr. Napat Harnpornchai (Chiang Mai University). I am very lucky to have all of them in my thesis jury. Special thanks to Assoc. Prof. Dr. Yacine Ouzrout, for the last three years that I spent under his tutelage, which has been a wonderful period of my life. His advice has improved the quality of my research. I also want to express my thanks to Assoc. Prof. Dr. Sermkiat Jomjunyong for being the chairman of my examination.

Many thanks to three reviewers of my thesis, Prof. Dr. Sebti Foufou, Assoc. Prof. Dr. Nivit Charoenchai and Prof. Dr. Ahmed Lbath, for their great patience and valuable suggestions. Without their hard work, the thesis can never be completed on time. I am also thankful to my proof-reader Dr. Paul Goldsmith.

I appreciate the Euro-Asia Collaboration and NetWorking in Information Engineering System Technology (EAST-WEST) Project, which generously supported my research, travels, and conferences. I am also thankful for the help provided by all partners of the Erasmus Mundus Project, which is supported by the European Commission.

Lastly, I offer my regards and blessings to my colleagues at College of Arts, Media and Technology, I.U.T. Lumière, Student Association in Lyon, and CERRAL

Centre, for their support, help, in any respect during the completion of the project. The utmost thankfulness goes to my parents, my family, and my special friend Mr.Nipon Patcharasatid for their encouragement, their support and their sacrifice, without them, this thesis would have never seen the light of day.
