The purpose of this experimental research is to determine the efficiency of an instructional package for teaching chorus in the general educational course for non – music major students, at Mahidol University.

This study assessed the package's efficiency using one treatment group consisting of 1st year undergraduate students of the Faculty of Science, Mahidol University. The 50 students were designated as the 50 student were designated as the treatment group and were taught for 10 periods (90 minutes each) using this prepared instructional package.

The results show that the instructional package had an effectiveness ratio of 90.80 / 95.60 for theoretical learning and 87.04 / 90.20 for practicum skill development.
