

ABSTRACT

The study was conducted to verify behavioral and developmental teaching of technical college teacher under supervision of Department of Vocational Education, Ministry of Education. It was found that the behavioral teaching was a complex model. The recommended behaviors were : the students operated their tasks under teacher supervised closely, the teacher demonstrated some learning task and the students observed what he done, the teacher asked some questions to students in order to assess what had they learned, etc. The sufficient method for development of teaching behavior should have analysed a specific course of study and then develop the expected teaching behaviors. In developmental study, it was found that the method of teaching and the audio - visual aids were used in more different ways than the past.
