

Arthittaya Thongsan 2014: The Study of the Language in the Idea and Coherent
Compilation to the Essay of Student in M6. Master of Arts (Applied Linguistics),
Major Field: Applied Linguistics, Department of Linguistics. Thesis Advisor:
Mrs. Kanita Chaimano, Ph.D. 170 pages.

This research aimed to study the idea composing and the cohesion to the essay of the
student in M.6 was the sample group of Pakkred Secondary School, Nonthaburi Province.

The research found that the idea composing of the sample affects the essays, namely a
compiler was confused and maze or a compiler had not a proper idea of each topic as a result in
an essay was likely in the fair or need the improvement. In contrast, a compiler had a good idea
systematically was based on a hierarchy and to be maze or a compiler used a reasonable idea
form would result in the individual essays are well-tended. In the part of the Cohesion, the
researcher found that all of samples used the Demonstrative Reference was the most

The Conjunction that the group of sample who wrote the essay in ordering a story idea
and sorting the sequence location that used the Additive Conjunction at the most And the minor
were the Causal, the Contrastive, the Temporal and the last was the Alternative Conjunction.
However it didn't appear was the Conditional Conjunction. The sample essay in the form of the
Causal was the difference of the two sample groups because they use the most. The minor were
the Additive, the Conditional, the Contrastive, and the Alternative Conjunction sequentially and
the last was the Temporal Conjunction. The study of the idea composing and the cohesion to the
essay, the researcher found that both of them were a relationship that is consistent; if the sample
has compiled ideas systematically, the cohesion in each sentence was a meaningful relationship
continuously. if the sample is not systematically compiled ideas, a confusing and maze cohesion
to be unrelated meaningful way or if there is relatively no continuity. In addition, the researcher
also considered that if the samples were used to link the various forms of more or less well too,
Discourse that would make the satisfaction of reader or auditor than the samples used the
average number.
