

## LIST OF FIGURES

| Figures |                                                                                                                                                          | Page |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| 1       | Sildenafil (Viagra <sup>®</sup> ), a PDE5 inhibitor.....                                                                                                 | 2    |
| 2       | Flavone skeleton.....                                                                                                                                    | 3    |
| 3       | Phenanthrene skeleton.....                                                                                                                               | 3    |
| 4       | Papaverine.....                                                                                                                                          | 4    |
| 5       | The hydrolysis reaction of cGMP by PDE5.....                                                                                                             | 6    |
| 6       | The three major types of mammalian PDEs classified according<br>to their substrate selectivities.....                                                    | 7    |
| 7       | Similarities and differences between PDE5 and PDE6.....                                                                                                  | 10   |
| 8       | PDE5 inhibitors.....                                                                                                                                     | 11   |
| 9       | Factors that cause erectile dysfunction.....                                                                                                             | 12   |
| 10      | The mechanism of PDE5 inhibitors in corpus cavernosum.....                                                                                               | 13   |
| 11      | Natural substances against PDE5.....                                                                                                                     | 14   |
| 12      | Flowers and pseudo-bulbs of <i>E. macrobulbon</i> .....                                                                                                  | 18   |
| 13      | 9,10 dihydrophenanthrene compounds in <i>Eulophia</i> spp.....                                                                                           | 19   |
| 14      | 9,10 dehydrophenanthrene compounds in <i>Eulophia</i> spp.....                                                                                           | 20   |
| 15      | The 7-methoxyflavone constituents from rhizomes of<br><i>K. parviflora</i> .....                                                                         | 28   |
| 16      | Solvent-solvent partition procedure of <i>E. macrobulbon</i><br>extract.....                                                                             | 30   |
| 17      | Isolation procedure of PDE5 inhibitors from <i>E. macrobulbon</i> .....                                                                                  | 32   |
| 18      | Synthetic pathway for amide, DHIQ and THIQ derivatives.....                                                                                              | 35   |
| 19      | Principle of radioactive PDE assay.....                                                                                                                  | 39   |
| 20      | Vasodilator effect protocol.....                                                                                                                         | 43   |
| 21      | PDE5 inhibitory activity of crude EtOH extract of<br><i>E. macrobulbon</i> and its partition extracts at a final<br>concentration of 50 µg/ml (n=3)..... | 52   |
| 22      | Structures of phenanthrenes isolated from <i>E. macrobulbon</i><br>extract.....                                                                          | 53   |

## LIST OF FIGURES (CONT.)

| Figures |                                                                                                                                                                                                                                                 | Page |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| 23      | Diagnostic HMBC (a) and NOESY (b) correlations of 9,10-dihydro-2,5-dimethoxyphenanthrene-1,7-diol ( <b>9</b> ).....                                                                                                                             | 54   |
| 24      | Diagnostic HMBC (a) and NOESY(b) correlations of 9,10-dihydro-4-(4'-hydroxybenzyl)-2,5-dimethoxyphenanthrene-1,7-diol ( <b>10</b> ).....                                                                                                        | 58   |
| 25      | Diagnostic HMBC (a) and NOESY(b) correlations of 1-(4'-hydroxybenzyl)-4,8-dimethoxyphenanthrene-2,7-diol ( <b>11</b> )....                                                                                                                      | 62   |
| 26      | Diagnostic HMBC (a) and NOESY(b) correlations of 1,5,7-trimethoxyphenanthrene-2,6-diol ( <b>12</b> ) (in methanol- <i>d</i> <sub>4</sub> ).....                                                                                                 | 68   |
| 27      | A typical trace of vasorelaxant effect of <i>E. macrobulbon</i> extract (1-200 ug/ml) (a), a typical trace of vasorelaxant effect of DMSO (0.2% v/v in bath) (b), Log concentration – relaxatio curve of <i>E. macrobulbon</i> extract (c)..... | 72   |
| 28      | EI-MS spectrum of 9,10-dihydro-2,5-dimethoxyphenanthrene-1,7-diol ( <b>9</b> ).....                                                                                                                                                             | 93   |
| 29      | IR spectrum of 9,10-dihydro-2,5-dimethoxyphenanthrene-1,7-diol ( <b>9</b> ).....                                                                                                                                                                | 94   |
| 30      | <sup>1</sup> H-NMR spectrum of 9,10-dihydro-2,5-dimethoxyphenanthrene-1,7-diol ( <b>9</b> ) (400 MHz, acetone- <i>d</i> <sub>6</sub> )..                                                                                                        | 95   |
| 31      | Enlarged <sup>1</sup> H-NMR spectrum of 9,10-dihydro-2,5-dimethoxyphenanthrene-1,7-diol ( <b>9</b> ) (400 MHz, acetone- <i>d</i> <sub>6</sub> ) (6.3-7.8ppm, 400 MHz, CDCl <sub>3</sub> ).....                                                  | 96   |
| 32      | Enlarged <sup>1</sup> H-NMR spectrum of 9,10-dihydro-2,5-dimethoxyphenanthrene-1,7-diol ( <b>9</b> ) (400 MHz, acetone- <i>d</i> <sub>6</sub> ) (6.3-7.8ppm, 400 MHz, CDCl <sub>3</sub> ).....                                                  | 97   |
| 33      | <sup>13</sup> C-NMR spectrum of 9,10-dihydro-2,5-dimethoxyphenanthrene-1,7-diol ( <b>9</b> ) (100 MHz, acetone- <i>d</i> <sub>6</sub> )..                                                                                                       | 98   |

## LIST OF FIGURES (CONT.)

| Figures |                                                                                                                                                                                                                                     | Page |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| 34      | DEPT 135 spectrum of 9,10-dihydro-2,5-dimethoxyphenanthrene-1,7-diol ( <b>9</b> ) (100 MHz, acetone- <i>d</i> <sub>6</sub> )..                                                                                                      | 99   |
| 35      | HMQC spectrum of 9,10-dihydro-2,5-dimethoxyphenanthrene-1,7-diol ( <b>9</b> ) (400 MHz, acetone- <i>d</i> <sub>6</sub> ).....                                                                                                       | 100  |
| 36      | HMBC spectrum of 9,10-dihydro-2,5-dimethoxyphenanthrene-1,7-diol ( <b>9</b> ) (400 MHz, acetone- <i>d</i> <sub>6</sub> ).....                                                                                                       | 101  |
| 37      | NOESY spectrum of 9,10-dihydro-2,5-dimethoxyphenanthrene-1,7-diol ( <b>9</b> ) (400 MHz, acetone- <i>d</i> <sub>6</sub> ).....                                                                                                      | 102  |
| 38      | EI-MS spectrum of 9,10-dihydro-4-(4'-hydroxybenzyl)-2,7-dimethoxyphenanthrene-1,7-diol ( <b>10</b> ).....                                                                                                                           | 103  |
| 39      | IR spectrum of 9,10-dihydro-4-(4'-hydroxybenzyl)-2,7-dimethoxyphenanthrene-1,7-diol ( <b>10</b> ).....                                                                                                                              | 104  |
| 40      | <sup>1</sup> H-NMR spectrum of 9,10-dihydro-4-(4'-hydroxybenzyl)-2,7-dimethoxyphenanthrene-1,7-diol ( <b>10</b> ) (400 MHz, methanol- <i>d</i> <sub>4</sub> )...                                                                    | 105  |
| 41      | Enlarged <sup>1</sup> H-NMR spectrum of 9,10-dihydro-4-(4'-hydroxybenzyl)-2,7-dimethoxyphenanthrene-1,7-diol ( <b>10</b> ) (400 MHz, methanol- <i>d</i> <sub>4</sub> ) (6.2-6.8ppm, 400 MHz, methanol- <i>d</i> <sub>4</sub> )..... | 106  |
| 42      | Enlarged <sup>1</sup> H-NMR spectrum of 9,10-dihydro-4-(4'-hydroxybenzyl)-2,7-dimethoxyphenanthrene-1,7-diol ( <b>10</b> ) (400 MHz, methanol- <i>d</i> <sub>4</sub> ) (1.9-4.0ppm, 400 MHz, methanol- <i>d</i> <sub>4</sub> )..... | 107  |
| 43      | Enlarged <sup>1</sup> H-NMR spectrum of 9,10-dihydro-4-(4'-hydroxybenzyl)-2,7-dimethoxyphenanthrene-1,7-diol ( <b>10</b> ) (400MHz, methanol <i>d</i> <sub>4</sub> ) (1.95-3.25ppm, 400 MHz, methanol- <i>d</i> <sub>4</sub> )..... | 108  |

## LIST OF FIGURES (CONT.)

| Figures |                                                                                                                                                                                             | Page |
